		<p>Public Inquiries:</p> <p>1. Draft Board response to M.Ph.A.'s request that the Board make "point of care testing" a legislative priority.</p> <p>SUMMARY: The Board is supportive of this initiative and recognizes that "point of care testing" would provide opportunities for Maryland pharmacists to aid in improving the health care of the citizens of Maryland. Unfortunately, the Department of Health and Mental Hygiene's deadline for submitting legislative proposals for 2009 has passed. That deadline usually occurs around July 1st of each year. If legislation on this issue is introduced in the Legislature during the 2009 session, the Board would review it thoroughly and will consider its support at that time.</p> <p>2. Draft Board response to Bonnie Rosiak regarding the request for information on the supervision of technicians and the regulations regarding interchange of drugs.</p> <p>SUMMARY: A pharmacy technician may not be present in the pharmacy when the pharmacist is not physically available on-site. "On-site" means the premises of the permit holder. The surrounding hospital area is not within the pharmacy permit area. Only the pharmacy and its satellite pharmacy areas are considered the premises of the pharmacy permit and a pharmacist must be present when these areas are open. See Health Occupations Article, 12-403(b) (3) and (4), Annotated Code of Maryland, where it states that a pharmacy permit holder shall ensure that a licensed pharmacist be immediately available on the premises to provide pharmacy services at all times the pharmacy is in operation, and shall be supervised by a licensed pharmacist who is responsible for the operations of the pharmacy at all times the pharmacy is in operation.</p> <p>Combination products and two individual products may not be switched unless a therapeutic interchange program exists in the hospital setting or the switch is authorized by the prescriber. See the Code of Maryland Regulations (COMAR) 10.34.10.01C which states that a pharmacist may not perform a therapeutic interchange without the prior approval of the authorized prescriber. The one exception is where a pharmacist who provides a pharmacy service to a patient of a hospital, as defined in Health-General Article, §19-301, Annotated Code of Maryland, or a resident of a comprehensive care or extended care facility, as defined in COMAR 10.07.02.01B, may perform a therapeutic interchange without the prior approval of the authorized prescriber if the governing body of the hospital, comprehensive care facility, or extended care facility has established procedures for therapeutic interchange.</p>	<p>1. Motion: C. Anderson made a motion to approve the draft letter as amended.</p> <p>H. Finke seconded the motion.</p> <p>R. Matens abstained</p> <p>2. Motion: D. Board Action: The Board voted to approve the motion.</p>

		<p>3. Draft Board response to Peter Smith regarding the request for information about the regulations for changing of date on Schedule II prescriptions.</p> <p>SUMMARY: Please be advised that the Board is adopting the DEA policy: The pharmacist may add the patient's address or change the patient's address with verification. The pharmacist may change or add the dosage form, drug strength, drug quantity, directions for use, or issue date only after consultation with and agreement of the prescribing practitioner.</p> <p>Such consultations and corresponding changes should be noted on the prescription as well as the patient's medical record. Pharmacists and practitioners must comply with any State or local laws, regulations, or policies prohibiting any of these changes to controlled substance prescriptions. The majority of changes can be made only after the pharmacist contacts the prescribing practitioner. The pharmacist is never permitted to make changes to the patient's name, controlled substance prescribed, except for generic substitution permitted by State law, or the prescriber's signature.</p> <p>The DEA website is: http://www.deadiversion.usdoj.gov/fag/general.htm#rx_change</p>	<p>3.
